DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-6 and 8-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Heidel et al (US 6,289,261 B1) in view of Cassidy et al (US 5,615,625).

Regarding Claims 1-6 and 8-17, Heidel discloses a money operated machine (14) with removable money cassette (20).

Regarding Claims 1-2, 6, 10, 12, 13, 15 Heidel does not expressly disclose, but Cassidy discloses a money cassette (20) having a rechargeable voltage source as mentioned at col. 4, lines 59-64 and col. 3, lines 32-40. A voltage source for recharging the battery is mentioned as element (92).

At the time of the invention, it would have been obvious to have used Cassidy's intelligent money cassette in Heidel's money operated device for the purpose of securing cash in the cassette and providing tracking features.

Regarding Claims 3 and 14, official notice is taken that it would have been obvious to place Cassidy's storage/transportation frames in the form of station (18) on a vehicle such as an armored truck.

Regarding Claims 4 and 9, note Cassidy's charging station (18).

Regarding Claims 5 and 16, display (72) which is connected to battery level sensor (66).

4. Claims 8, 11 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grainger et al (US 5,732,812) in view of Cassidy et al (US 5,615,625).

Regarding Claims 8 and 11, Grainger discloses a money operated machine (10) with removable money cassette (27).

Regarding Claims 8, 11 and 17, Grainger does not expressly disclose, but Cassidy discloses a money cassette (20) having a rechargeable voltage source as mentioned at col. 4, lines 59-64 and col. 3, lines 32-40. A voltage source for recharging the battery is mentioned as element (92).

At the time of the invention, it would have been obvious to have used Cassidy's intelligent money cassette in Grainger's money operated parking device for the purpose of securing cash in the cassette and providing tracking features.
